**Re: Final HPV Submission for Diallyldimethylammonium Chloride**  
**(DADMAC, CAS No. 7398-69-8)**

Dear Mr. Hernandez:

On behalf of the DADMAC HPV Committee, attached please find the final submission for diallyldimethylammonium chloride (DADMAC, CAS No. 7398-69-8) under the US HPV Challenge Program.

This submission was prompted, in part, by the Agency's September 29, 2006 letter requesting the submission of any outstanding information relating to the Committee's commitment for this compound as part of the US HPV Challenge Program. In that letter, EPA stated that the Committee did not respond to EPA's comments on its earlier submission; however, we would like to clarify that the Committee indeed submitted a response on November 22, 2005, which EPA has posted on its HPV web site.

The Consortium views its HPV commitment for DADMAC as complete following its review of the available data, the submission to EPA of an initial set of robust summaries and a test plan, and, subsequent responses to comments including the attached updated materials.

If you have any questions, please do not hesitate to contact me.

Sincerely,

\_\_\_\_\_  
Robert J. Fensterheim  
Executive Director
